FastenMaster® Cortex® now available for TAMKO® EverGrain® Classic Colors

FastenMaster Introduces the Cortex Concealed Fastening System for TAMKO EverGrain Classic Colors Decking

Agawam, MA (June, 2009) – FastenMaster is extending the Cortex Concealed Fastening System line to include TAMKO EverGrain Classic Colors decking.

The program will be introduced in June, with the following 2009 EverGrain Classic colors being available:

- Weathered Wood
- Redwood
- Cape Cod Grey
- Cedar

This addition to the FastenMaster Cortex line will now allow EverGrain installers the ability to offer their customers the strength of a through-fastened deck combined with a beautiful finished look.

“We are excited to add the 2009 EverGrain Classic Colors to the Cortex line,” said Tim Gillis, FastenMaster Marketing Manager. “EverGrain is one of the great brands of composite decking and the Cortex System works extremely well with it.”

The Cortex System is installed using a standard drill and the Cortex Setting Tool. Simply drive the Cortex Screw to the preset level below the EverGrain deck surface. This will create a neatly cored hole above the head of the fastener. Place the Cortex Engineered Plug into the hole and gently tap the plug flush with the surface.

Unlike other hidden systems, the Cortex System enables a user to conceal all fasteners throughout the deck. Cortex handles the first and last board, stairs, and angled decks.

“The Cortex System for EverGrain Classic must be used in the 2009 version of the EverGrain Classic boards. It has been fully tested and is guaranteed.” added Mark Guthrie, FastenMaster Technical Manager.

The FastenMaster Cortex Concealed Fastening System is packaged in 100 Sq Ft and 300 Sq Ft packages. Each pack comes complete with ACQ approved screws, setting tools, and the Cortex plugs.
