California Proposition 65 Information

These products contain nickel, carbon black, and titanium dioxide which are known to the State of California to cause cancer. However, the nickel in this product is bound within the steel alloy of this product and no exposure can occur. Prop 65 warnings are not required for stainless and other specialty steels under typical use scenarios. The available science and Prop 65 enforcement action precedent show that any potential exposures are minimal and do not rise to the level that would require a warning. The titanium dioxide and carbon black are inextricably bound in a polymer matrix and no exposure can occur. For more information go to www.P65Warnings.ca.gov.
